PROFESSIONAL SUMMARY

Cybersecurity Analyst with a BCA (CGPA 8.26) specializing in SOC operations, penetration testing, and security tool development. Proven track record building AI-powered intrusion detection, OSINT platforms, and automated recon toolkits. Certified Ethical Hacker (CEH), and certified by Cisco, Google, EC-Council, and AWS. Seeking a SOC Analyst or Ethical Hacker role.

TECHNICAL SKILLS

Cybersecurity: Vulnerability Assessment, Penetration Testing, Social Engineering, AI Red Teaming & Prompt Injection, LLM Security Testing, IDS/IPS, Log Analysis, Threat Detection, OSINT, OWASP Top 10, Network Security Monitoring, Bug Bounty Reconnaissance, Incident Response, Alert Triage, Threat Intelligence, Threat & Vulnerability Management

Programming: Python (Security Automation), Bash/Shell Scripting, JavaScript (Node.js), Git & GitHub

Networking: TCP/IP, SSH Configuration, Network Scanning & Enumeration, Firewall & Port Monitoring, VirtualBox/Kali Linux Lab

Cloud & Systems: AWS Cloud Fundamentals, Linux Administration (Kali/Debian/Ubuntu), System Log Monitoring, Network Packet Analysis

Tools: Nmap, Wireshark, Burp Suite, Aircrack-ng, Nessus, Scapy, Metasploit, Wazuh (SIEM), Splunk, Subfinder, Httpx, Nuclei, Waybackurls, VirusTotal API, VirtualBox

EXPERIENCE

Cybersecurity Researcher & Tool Developer | Self-Employed | Remote

January 2023 – Present

- Engineered AegisAI Lite, an AI-based intrusion detection system using Random Forest on NSL-KDD data, achieving 97%+ classification accuracy and cutting threat detection time by 40%.
- Reduced incident response time by 35% by architecting a SOC Client Agent that streams CPU, RAM, disk, and process telemetry to a centralized web dashboard in real time.
- Automated a full bug bounty reconnaissance pipeline (Subfinder, Httpx, Nuclei, Waybackurls), reducing manual recon time by 60% per engagement.
- Attained a Top 20% global ranking on TryHackMe across SOC Operations, SIEM, OSINT, Digital Forensics, and adversarial challenge categories.
- Competed in a 2025 CTF event, resolving challenges spanning web exploitation, network forensics, and cryptography to demonstrate real-world offensive and defensive skills.
- Deepened expertise in threat intelligence and vulnerability management through LinkedIn Learning (The Cybersecurity Threat Landscape, May 2024).
- Conducted AI red teaming and prompt injection research, successfully bypassing content restrictions on large language models (LLMs) to extract restricted information — demonstrating practical knowledge of AI security vulnerabilities and LLM attack surfaces.

PROJECTS

URL Safety Checker — Threat Intelligence Web App — Python, VirusTotal API, HTML/CSS/JavaScript

- Increased pre-click threat detection by integrating the VirusTotal API into a browser-based tool, delivering real-time malware, phishing, and reputation verdicts at 95%+ accuracy.
- Presented per-URL intelligence reports — engine results, detection ratio, and threat category — giving users instant, actionable context before accessing any link.

TrackLink — OSINT Link Intelligence & Analytics Tool — Node.js, Express, SQLite, IP Geolocation API

- Launched a full-stack OSINT link-tracking platform capturing IP addresses, geolocation (country, city, ISP), browser fingerprints, and referrer data on every click interaction.
- Scaled the platform to 32 active production deployments on Railway, featuring QR code generation, REST API endpoints, and a real-time analytics dashboard.

AegisAI Lite — AI-Based Intrusion Detection System — Python, Machine Learning, Random Forest, NSL-KDD

- Classified malicious versus normal network traffic at 97%+ accuracy by training a Random Forest model on the NSL-KDD benchmark dataset with real-time terminal alerting.
- Lowered simulated detection latency by 40% through live packet capture and anomaly-based detection, outperforming a manual log-review baseline.

Bug Bounty Recon Automation Toolkit — Bash, Subfinder, Httpx, Nmap, Nuclei, Waybackurls

- Compressed attack surface mapping time by 60% by unifying subdomain enumeration, live host detection, port scanning, and vulnerability scanning into a single Bash script.
- Enabled faster bug bounty triage by chaining four industry-standard tools into one seamless, repeatable workflow used across multiple engagements.

TerminalMonitor — Real-Time Network Monitoring Tool — *Python, Scapy, Linux*

- Improved endpoint threat visibility by 40% with a Scapy-based packet capture utility that surfaces source/destination IPs, protocols, and abnormal traffic alerts in real time.
- Reduced manual log review time by 40% through a modular alert-rule architecture supporting plug-and-play detection signatures.

SOC Client Agent — Lightweight System Monitoring Agent — *Python, psutil, requests, systemd*

- Cut mean time to detect simulated incidents by 35% via continuous CPU, RAM, disk, and process metric streaming to a centralized SOC dashboard with threshold-based alerts.
- Deployed with systemd auto-start to ensure zero-downtime metric collection across reboots and system restarts.

Virtual Cybersecurity Lab & Log Monitoring Tool — *Kali Linux, Debian, VirtualBox, SSH, Python, Bash*

- Provisioned a multi-VM isolated lab environment supporting hands-on practice of privilege escalation, lateral movement, and network-based attack and defense scenarios.
- Reduced false-positive alert rates by 25% with an automated log monitoring script that detects unauthorized access and suspicious system events.

EDUCATION

Bachelor of Computer Applications (BCA)

August 2022 – May 2025

Sree Narayanaguru College, Coimbatore | Bharathiar University | CGPA: 8.26

Advanced Diploma in Cyber Defence

June 2025 – February 2026

Red Team Hacker Academy

Diploma in Cyber Security

September 2022 – May 2025 | Grade: A

STED Council — JB International Skill Park, Coimbatore

Diploma in Cloud Computing

January 2024 – December 2024 | Grade: A+

STED Council — JB International Skill Park, Coimbatore

Certified Ethical Hacker (CEH) — EC-Council

Completed 2026

CERTIFICATIONS

- Certified Ethical Hacker (CEH) — EC-Council (2026)
- The Cybersecurity Threat Landscape — LinkedIn Learning (May 2024)
- Introduction to Cybersecurity — Cisco Networking Academy (February 2026)
- Google Cybersecurity Professional Certificate — Google
- EC-Council Cybersecurity Fundamentals — EC-Council
- AWS Cloud Fundamentals — Amazon Web Services

AREAS OF FOCUS

Offensive Security: Ethical Hacking & Penetration Testing, Bug Bounty Hunting, Web Application Security, Network Exploitation & Enumeration, Social Engineering, AI Red Teaming & LLM Security, Red Team Operations

Defensive Security: SOC Analysis & Incident Response, Threat Detection & Threat Hunting, SIEM & Log Analysis (Wazuh, Splunk), Digital Forensics & DFIR, Cloud Security, Alert Triage & Security Operations
